

Mobile CoBot Pedestal

- Flexible Deployment
- Small Footprint
- Affordable
- Manufactured in USA

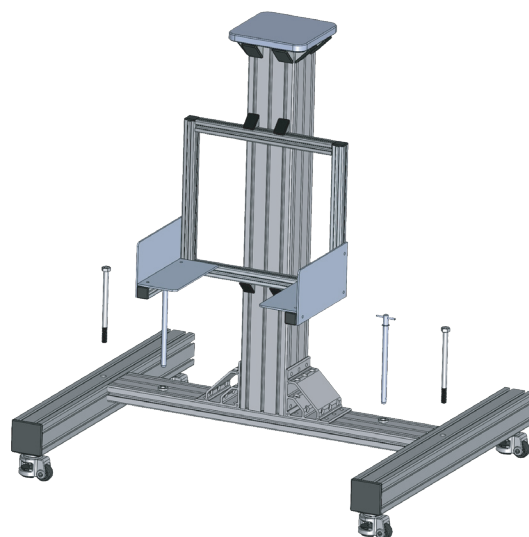

\$1,995 Pedestal

Industrial. Flexible. Mobile.

Bertelkamp Automation's Cobot Pedestal is designed to offer maximum deployment flexi-bility for your Cobot. Welded steel and high quality aluminum offers maximum rigidity and application flexibility.

The systems ergonomic design, made specifically for Cobots, makes it easy for one person to move the base from one location to another. Portability, combined with the unique vision capabilities of the TM Cobots, makes it simple for users to quickly deploy their Cobot to initiate a new task.

Customizable to meet your specific requirements, the base of the pedestal also features a shelf to house the robot controller and pendant arm for ease of mobility. Priced at a fraction of the cost of competitive pedestals, our system offers small to medium-sized facilities ultimate flexibility and maximum return on investment.
