

Power Your Factory with **IQ**

AI-enabled platform that automates integration

Meet

When you are facing the cost and complexity of a palletizing system integration, IQ captures the reality of your operation, connects stakeholders, guides each step, and **generates a predictable Palletizing Workcell path from the first conversation to deployment.**

IQ automates the integration workflow by generating workcells from our components and automatically generates a project. Turns your physical environment into a digital model. You can watch the resulting workcell come to life, simulated and validated while getting an instant read of your automation potential with predictable execution and ROI information.

Unlimited Power Supplies (UPS)

Bridge power failures reliably

In the event of brief power failures, **WAGO's uninterruptible power supplies (UPS) continue to provide DC power**, ensuring safe system operation.

For prolonged power outages, our UPS solutions can keep potentially critical processes in a safe state, preventing unwanted impacts and data loss.

WAGO offers several solutions depending on the buffer time required:

- ✓ UPS with Capacitive Storage (Supercaps)
- ✓ UPS with LiFePO4 Storage
- ✓ UPS with Charger/Controller for Lead-Acid Batteries
- ✓ Battery Modules
- ✓ Capacitive Buffer Modules

Dorner ERT Pallet System

Roller-driven conveyors maximize flexibility and productivity

The belt-free, open-frame design of Dorner's ERT Pallet Conveyors makes them the perfect option for Class 4 cleanroom applications. With the patent-pending gearbox of the roller-driven conveyors, **ERT conveyors maximize flexibility and productivity.**

ERT250 Loads up to 114 kg (250 lbs)

Dorner's ERT150 and ERT250 conveyors are innovative roller technology-driven conveyor systems for pallet and tray handling. The rollers are driven by an energy-efficient linear gearbox that provides added flexibility with motor positioning and zoning. ERT conveyors are easy to reconfigure in the field without the need for specialty tools or training.

Swivellink Robot Accessories

Pre-engineered and widely compatible

Swivellink offers a range of cobot bases and support mounts including; parts feeder stands, mobile base, robot pedestals and mobile carts.

These accessories are available in configurations compatible with a wide array of industrial cobot manufacturers.

- **Mobile Bases** – Heavy duty weld construction, locking casters
- **Controller Brackets** – Bolts directly to pedestal, includes hardware
- **Base Adapters** – Perfect for putting robot at an angle
- **Cobot Pedestals** – Available from 12" to 48" in 6" increments
- **Parts Feeder** – Holds finished parts or blanks
- **Mobile Table Carts** – Integrated robot mount for mobility
