

Perfect Match: Pneumatic Automation

Simple, cost-effective pneumatic control

This perfect match combines products for your everyday automation needs. This winning combination helps reduce space, time and cost.

These products are designed to offer high functionality and compactness at the same high quality you expect from Festo for users looking for simple, cost-effective pneumatic control.

This select range of products includes compact and robust valves, guided and mini slide units, compact cylinders, regulators, filter regulators and tubing. And they each form part of the Festo core range - take advantage of products which offer shorter delivery times and competitive prices from one single source supplier.

D:PLOY Robotic Automation Platform

Automates the process of getting a robotic applications up and running

D:PLOY is industry's first automated platform for building, running, monitoring, and re-deploying collaborative applications. It automates the process of getting a robotic application up and running, allowing deployment directly on the manufacturing floor, with zero programming and zero simulations.

With D:PLOY, complete applications can be deployed in just a few hours, saving of up to 90% on deployment and re-deployment time.

Mitsubishi Electric's new MELSOFT Gemini 3D Simulator Software lets you build animated 3D models of machines and production lines to quickly identify and resolve design, operation, and maintenance issues BEFORE you install onsite.

From initial construction to existing line conversions, MELSOFT Gemini Simulator Software eliminates pain points during builds and retrofits.

- Ensure design viability before execution
- Maximize the effectiveness of deliverables
- Streamline communication between stakeholders
- Speed product to market
- Quickly recover when issues occur

ELECYLINDER® Stopper Cylinder

Ideal for conveyor stopper applications

No air? No problem. The new compact EC stopper cylinder type is operable with electricity alone, usable with just a 24V power supply. Ideal for conveyor stopper applications these cylinders save energy in logistics and transport lines. Available in 5 sizes and with built-in controller, these 2-point positioning actuators offer simple and wireless operation

- Workpieces up to 50kg
- Handles impact loads in the radial direction well
- Power-off Brake option
- Food processing machine grease available (White Alcom grease)
